Does your company have technology that could be of interest to the US Army?

In an effort to reach non-traditional providers of products and services, the US Army has engaged InSitech, Inc., to lead an innovative and proactive approach to identify and contact companies that have technologies relevant to current military program needs. **The Army is especially interested in working with small businesses that have not contracted extensively with the Department of Defense in the past.**

Specific Technologies of Interest

- Lasers
- Batteries, Power & Energy
- Guidance, Navigation and Control
- Advanced Electronic Components
- Radios & Communications
- Advanced Materials for Sensors and Transducers
- Non-toxic, Anti-corrosive Coatings

If you would like to have your company considered, please visit [www.Tech-RFI.org](http://www.Tech-RFI.org) today! NOTE: There are no obligations or fees whatsoever for you to participate in our RFI process.

*The deadline for responses is midnight on March 12, 2010.*
